

Python Libraries

There are many python libraries which implement evolutionary algorithms:

DEAP : evolutionary computation framework

<https://github.com/DEAP/deap>

Pyvolution : Evolutionary Algorithms Framework.

<https://pypi.org/project/Pyvolution/1.0/>

pySTEP : Python Strongly Typed gEnetic Programming

<http://pystep.sourceforge.net/>

geneticalgs : Implementation of standard, diffusion and migration models of genetic algorithms.

<https://pypi.org/project/geneticalgs/>

ga2 : A simple robust Genetic Algorithm utility

<https://pypi.org/project/ga2/>
